

BioInfect 2024

With the WHO declaring antimicrobial resistance (AMR) one of the top 10 global public health threats facing humanity and with 1.27 million deaths directly related to AMR plus antimicrobial-resistant infections playing a role in almost 5 million deaths in 2019, tackling the issue requires a united, multisectoral approach.

Antimicrobial resistance: the next pandemic

BioInfect will examine the issues surrounding the increasing threat of AMR and how it can be tackled, such as the need for greater innovation and investment in new drug development, the effectiveness of current and proposed reimbursement models, the efficacy of new and alternative treatments and how organisations, stakeholders and policymakers can work together more effectively to combat this global issue.

DELEGATE FEES

Premium Member—£143 + VAT

Member—£175.00 + VAT

Non-Member—£285.00 + VAT
