

What does global reach look like?

World Courier ensures a consistent customer experience around the globe with a network that encompasses nearly 10 times the scale of other specialty logistics providers. The power of our global network means peace of mind in transport management, confidence in increased operational efficiency and an enhanced distribution strategy.

No other specialty logistics company can match our breadth:

- 2,000+ associates across 140+ company-owned offices globally
- Operations in 50+ countries
- 13 strategically located depots around the world
- The power of our network — consistency of quality and service worldwide

Temperature-controlled Transport & Logistics

Minimize risk. Move medicine forward.

- World Courier CSS depot
- World Courier regional hub
- World Courier office

Advance Global Medicine with Flawless Execution

It takes hundreds of millions of dollars to develop products that enhance patient care and improve global health. World Courier's consultative approach to logistics management helps biopharma companies maximize that investment by transporting your time- and temperature-sensitive shipments securely across all global markets.

GxP

GMP › GOOD MANUFACTURING PRACTICE

GSP › GOOD STORAGE PRACTICE

GDP › GOOD DISTRIBUTION PRACTICE

GCP › GOOD CLINICAL PRACTICE

Setting the Standard for Quality

Our GxP-compliant practices mean we meet the most demanding industry expectations for execution without excursions and trusted transport of everything from clinical trial materials and patient samples to commercial drugs.

World Courier's in-depth knowledge of clinical trial logistics means you can depend on us as your partner throughout the trial process:

Planning

- Pre-trial coordination with sponsors, CROs, laboratories and site personnel
- Expert guidance on customs and import license requirements
- Optimal transport and scheduling routes
- Coordination of patient sample logistics
- Close contact with local site investigators to review protocol logistics and eliminate potential problems

Storage

- State-of-the-art, ISO 9001-, ISO 14001- and GxP-compliant investigational drug depots

Transport

- Shipment of time-critical and time-sensitive investigational drugs, samples, APIs, excipients and commercial products around the globe
- Management of bulk drugs and investigational supplies
- Temperature-controlled ground transport across Europe

Delivery

- Specialized brokerage assistance, customs clearance and delivery of consignments in over 220 territories and nations; pre-clearance whenever possible to ensure the shortest possible transit times

Supporting Infrastructure

- Extensive knowledge of GxP and quality management standards
- In-house temperature control specialists
- CTM-STAR™ inventory management
- Bio-STAR™ data management system that integrates and manages all aspects of a clinical trial study, from pre-trial through the last shipment
- Strict adherence to global SOPs for all activities
- Management of drug return and destruction procedures
- Ability to leverage AmerisourceBergen's commercialization expertise
