## Medicines Discovery Catapult relaunches Wolfson Radiochemistry facility in Manchester

Medicines Discovery Catapult has announced the relaunch of radiochemistry at the Wolfson Molecular Imaging Centre in Manchester. The facility, which was closed in 2020, includes the multi-million pound cyclotron one of only a handful in the UK. It will supply hard-to-make radiochemicals to drug discovery biotechs and academic innovators – increasing the UK's potential to discover new and better therapies for patients, faster.

## Researchers eye potential cure for blindness caused by injury

Researchers at the University of Bradford say they are close to perfecting a new technique that could revolutionise eye surgery and restore sight to people blinded due to injuries to their cornea. While corneal transplants from donors have been possible for some time - and earlier this year, an Israeli team carried out the world's first artificial corneal transplant - the new technique would effectively enable the body to 'grow' a new cornea.
