Event Summary: Celebrating the North of England as a key location for Pharma Manufacturing

The Bionow Pharma Manufacturing Conference saw more than 100 delegates come together to explore the challenges and opportunities for pharma manufacturing in the North through a series of presentations, panel discussions and networking sessions. The event aimed to start conversations through which manufacturing sites can begin to collaborate and build on respective areas of interest to better influence academia and Government Industrial Strategy to further support manufacturing in the life science sector.

F2G Ltd and Shionogi & Co, Ltd enter strategic collaboration to develop and commercialise the new antifungal agent olorofim in Europe and Asia

F2G Ltd and Shionogi & Co, Ltd have announced that they have entered a strategic collaboration to develop and commercialise the new antifungal agent olorofim for invasive fungal infections in Europe and Asia.

Olorofim is a novel oral antifungal therapy developed by F2G to treat invasive aspergillosis (IA) and other rare mold infections. Olorofim works through a unique mechanism of action, different from existing classes of antifungals, exerting fungicidal activity through inhibition of the pyrimidine synthesis pathway.

BELIEVE IN YOURSELF

Want more of a say in science training?

It's time for a fresh look at LabTech training programmes - we have developed an exciting and unique suit of courses to get the essential training and qualifications fast-tracked. This really could be the best option for your new starters: you have to train them anyway so why not look at ways to accelerate and enhance that training?

Calling all virtual drug discovery companies!

Do you need to consolidate your bioreagents and/or your clinical samples? Do you need to reduce non-value added tasks, allowing you to focus on your core service?

[Read More](#)

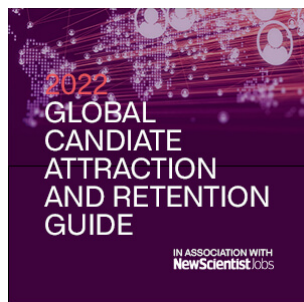

What happens if your sample freezer fails?

It's the worst case scenario for many laboratories and sample storage centres, your freezer has failed and your samples are ruined.

Whether it is due to the failure of a compressor, the power supply, or a temperature control issue, an ultra-low storage freezer failing can mean vital samples are spoiled within a matter of hours. With the sheer amount of user parts and variables in upright freezers it means that when they are employed for long term use, failure is a matter of when, not if.

Big changes coming for R&D in the life sciences sector

With the most significant changes to research and development (R&D) since 2000 on the way, R&D tax reliefs are no longer a given. Life sciences and biotech businesses need to prepare now to avoid missing out on vital reliefs.

R&D tax relief has always been seen by the life sciences sector as a well-established and reliable tax incentive that fulfils its purpose by encouraging innovation. Spin-outs and start-ups in the sector have relied on the relief since its introduction in 2000, and it's a valued support to cash flow in the early years before commercialisation.

What are the benefits of ERP for life sciences?

Life sciences companies can develop complex processes and requirements as they grow, but too often they continue using entry-level software solutions to manage their finances and day-to-day business operations.

Leading Enterprise Resource Planning (ERP) systems offer robust financial management and controls and crucially, unlike some entry-level solutions, they also provide the ability to scale and adapt as a life sciences business expands.
