

# Tuesday 14th March

JOIN US ONLINE ON FOR OUR SUPER  
POPULAR BIONOW CAREERS FAIR

FREE TO ATTEND FOR ALL STUDENTS  
THAT ARE ENROLLED BY UNIVERSITIES  
THAT ARE BIONOW MEMBERS.

## WHAT IS BIONOW ?

Bionow is a membership organisation for biomedical companies in the North of England. Bionow was established in 2011 as a company limited by guarantee to support business growth, competitiveness and innovation within the life sciences sector. We are continuing to grow and develop our offering in order to provide our members with a platform to succeed in a competitive business landscape. Our range of services to support your business growth is unrivalled and offers exceptional value for money.

The team at Bionow is committed to helping our members thrive and bring the life sciences community closer together.

# ORGANISATION OVERVEIWS

## AMBIT

Ambit works with business founders and hiring teams worldwide to meet immediate hiring needs and to create sustainable talent strategies for the future. We're part of AMICULUM, an international health consulting and communications business. Our specific focus is on high-growth businesses with a desire to do recruitment really well, who perhaps do not yet have a structure in place for talent acquisition that matches their company ambition. We can work with CEOs, founders and function leads to define hiring plans, or with TA teams who need support as their company grows

## ASTRAZENECA

AstraZeneca is one of the world's leading pharmaceutical companies, with a major presence in the UK. Our business is focused on providing innovative, effective medicines that make a real difference in important areas of healthcare.

Website: <http://www.astrazeneca.co.uk>

## BOUYGUES E&S CONTRACTING UK LTD

.Bouygues Energies & Services have a long-standing experience of over 50 years providing turnkey solutions to the life sciences industry. Offering fully integrated engineering solutions with a focus on energy and sustainability, for technically challenging and time-sensitive projects in critical environments. With multidisciplinary teams, they can offer unparalleled lifecycle solutions that yield the highest returns on investment. Dovetailing a wealth of cross-industry knowledge they ensure facilities, assets and infrastructure incorporate the best available technologies and processes. From concept to completion, they relish the challenge to make the impossible possible.

Website:<https://www.bouygues-es.co.uk/industry>

## CATSCI

An award-winning process research and development cro that provides perfect-for-purpose chemistry services and non-gmp material supply to customers across the globe with projects from lead optimisation through to product launch. our large pharma pedigree and extensive experience working on small molecule drug discovery and development projects mean that we can expedite your candidate selection, route design, process scale-up and optimisation, whilst ensuring seamless tech transfer for gmp manufacturing. favouring a consultative approach, we take the time to understand your project objectives to design and deliver customised solutions to match your specific demands.

website: <https://catsci.com/>

## BOYDS

Boyd Consultants Ltd provides consultancy services in relation to research and development projects for pharmaceutical and biotechnology products and medical devices: •Product Research and Development Strategy, Planning and Execution •Product Manufacturer Selection and Placement •Pre-Clinical Study Design and Placement •Clinical Product Development •Regulatory Strategy •Regulatory Submissions including Orphan Drug Application, CTA's, IND's MAA/NDA Applications, including Clinical Expert Reports and Overview •Product commercialization activities including Medical Affairs Support •SME Applications •Due Diligence Evaluations

Website: <https://boydconsultants.com/>

## CHARNWOOD MOLECULAR LTD

Charnwood Molecular is an award-winning, UK-based CRO, which has been providing expert support to medicinal chemistry and process research projects for over 20 years. At Charnwood Molecular we work with clients of all shapes, sizes and global standing. These clients range across a variety of sectors from virtual start-ups to established global agrochemical, materials, diagnostics, biotech and Pharma companies. All of our clients benefit from our proactive and open approach, geared towards rapidly advancing projects towards important key decision points and beyond.

Website: <https://www.charnwood-molecular.com>

## CENTRE FOR PROCESS INNOVATION LTD (CPI)

The Centre for Process Innovation is a UK-based technology innovation centre and part of the High Value Manufacturing Catapult. We use applied knowledge in science and engineering combined with state of the art facilities to enable our clients to develop, prove, prototype and scale up the next generation of products and processes. Our open innovation model enables clients to develop products and prove processes with minimal risk. We provide assets and expertise so our customers can demonstrate the process and prove it is feasible before investing substantial amounts of money in capital equipment and training. New products and processes can be proven; on paper, in the lab and in the plant before being manufactured at an industrial scale. By utilising our proven assets and expertise companies can take their products and processes to market faster. There is no down time in production as all of the process development is completed offsite and our technology transfer teams can help to transfer the product or process into full scale production.

## IGNIFI

IGNIFI is a full-service, independent creative agency that specialises in life sciences. Our team of 30 specialists blends a flexible, friendly attitude with the expertise, creativity and grit to get things done, and done well.

Our services include strategic planning, branding, design, creative, copy/medical writing and digital design and execution. Our clients are largely pharmaceutical, biotech and med device companies, for whom we develop omnichannel campaigns that are targeted to healthcare professionals and patients (both promotional and educational).

As well as a comprehensive offering of creative and digital solutions we offer a fulfilment service. We can print, store and distribute sales materials to field teams, manage inventories and help streamline the marketing process to maximise the reach and return on investment of branded collateral.

Website:<http://www.ignifi.co.uk>

The logo for IGNIFI, featuring the word "IGNIFI" in a bold, black, sans-serif font. The letter "I" is stylized with a small triangle above it. The logo is set against a solid blue square background.

## GSK

GSK is a global biopharma company with a special purpose – to unite science, technology and talent to get ahead of disease together. Getting ahead means preventing disease as well as treating it, and we aim to impact the health of 2.5 billion people around the world in the next 10 years. Our focus is on the science of the immune system, human genetics and advanced technologies.

**Website:** <https://www.gsk.com/en-gb/>

## LIVERPOOL CHIROCHEM LTD

Liverpool ChiroChem is an international, chemical technology innovator, on a mission to accelerate the discovery and development of high-quality drugs. The company has developed a suite of synthetic methodologies that have been used to produce thousands of novel, multifunctional 3D fragments/scaffolds/BB's to support NCE discovery & development. LCC's main focus areas are in DEL scaffolds, enantiopair fragment libraries, linkers for hetero bifunctionals, and a 3Discovery™ Virtual Library of over 1.5 million lead-like molecules.

EXPERTS IN SCIENTIFIC RECRUITMENT

## SEDA PHARMACEUTICAL DEVELOPMENT SERVICES

SEDA Pharmaceutical Development Services provide Pharmaceutical Development and Clinical Pharmacology services to the Pharma and Biotechnology Industries. We rapidly and efficiently develop medicinal products by providing coherent and synergistic services across four key areas not usually found in one organisation: Chemistry Manufacturing and Controls (CMC) – Product Development; Clinical Pharmacology and Biopharmaceutics; Drug Delivery System Scouting; Biotechnology Investment Support Services. Our philosophy is to transform the value of our clients' assets by genuinely integrating the clinical and pharmaceutical development needs for the product at the start and throughout the design process thus leading to rapid and efficient development: reducing false starts and ensuring the product meets the patient's needs. Additionally we will invest in modelling and simulation tools alongside, miniaturization, manufacturing innovations and automation to further increase our ability to take products rapidly into clinical trials and towards commercialisation. Our core technology areas include: Standard oral IR products; Enhanced formulations for poorly, soluble drugs; Complex parenterals; • Inhaled dosage forms. We have applied our knowledge across several therapeutic areas and importantly have extensive experience in the development of Oncology drugs. This includes those with 'breakthrough status' which puts particular pressure on the CMC and clinical pharmacology elements of drug development. We are made up of senior ex- big pharma professionals who are experienced across the entire product development timeline from pre-clinical development through to launch and have led development activities for several successful drugs. Additionally we are thought leaders at the forefront of recent scientific and technical developments in the pharmaceutical sciences where we have played leading roles in a number of high profile cross-industry collaborations.
