

Partner Snapshot: Integral Finance

Integral Finance is a Bionow Preferred Partner for specialist financial partnering with a focus on life sciences and healthcare.

Bionow members will receive a 10% discount on valuation work - and an initial no obligation assessment of how rigorous valuation approach can add value to your business.

Integral Finance work with clients to ensure that support is available at key times, such as in advance and during board meetings, interactions with potential funders, and in advance of relevant filing deadlines. Integral Finance will work alongside your existing management team and bring financial transparency to your business, identify opportunities for growth and develop financial capability, providing critical support from start-up to exit - meaning you build credibility and trust with key stakeholders and investors.

Information

Product and service information, blogs, funding rounds, reports and more from our Members and the wider life science sector

TIRO

The Evolving Hiring Landscape

Tiro, a leading recruitment and training provider for science and technology apprenticeships, has launched a new report outlining the key recruitment issues facing the science and technology sectors.

Alongside the report, Tiro brought together experts in recruitment, HR and training from organisations like AstraZeneca, SOCOTEC and TriRx to discuss the findings of the report in the first Tiro Summit. The wide ranging conversation expanded on the need for the science and technology sectors to ensure that there is a pipeline of young talent in place who can go on to become the industry leaders of the future.

Allostery under the lens of molecular dynamics simulations

Allosteric regulation of protein function can be interpreted as perturbations of conformational energy landscapes induced by protein structure modification. While the framework is generally accepted, it is currently challenging to construct models of protein conformational ensembles with sufficient spatiotemporal resolution and accuracy to inform drug discovery projects.

Looking 'under the hood': using pyflare to streamline hit identification

Flare™ is a drug-design software platform which can be used to predict whether compounds will bind to a given protein target, using techniques such as molecular docking and Electrostatic Complementarity™ (EC) analysis which compares the electrostatics of the bound putative ligand with the binding site of the target protein. The Flare GUI can seamlessly run such calculations on a maximum of 10,000 ligands, but what happens when we have millions of ligands? In such a case, it would not be possible to store all these structures and run calculations within the GUI. This is where using the pyflare command line can be very useful.

Healthcare 2.0

27th September 2023

Hallam Conference Centre, London

Discover the future of healthcare by joining us at Healthcare 2.0 - the premier healthcare conference for industry leaders, innovators, and entrepreneurs.

AI is here to stay: everywhere you look, an AI-driven company is setting out to disrupt healthcare, be that in drug discovery, diagnostics, or digital health.

The possibilities seem endless and the vision of a streamlined, effective and intelligent healthcare industry seems to be within reach. What will this step change in the industry truly look like? What are the most pertinent challenges yet to be tackled before we can get there, and how do we solve them? How will we integrate and implement all of these innovative solutions to realise this healthcare revolution?

REGISTER

Are you hosting conferences and digital events? Would you like Bionow to assist with the promotion of these events?

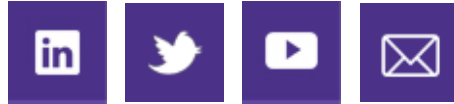

Join the National Innovation Centre for Data for two packed days of expert insights, practical workshops and opportunities to network. This is a must-attend event for anyone looking to stay ahead of the curve in the fast-evolving world of data science.
