Biotech
Initiative

Award-winning student-led society North West Biotech Initiative

North-West Biotech Initiative (NWBI), a non-profit, award-winning student initiative, primarily consists of post-graduate students from across universities in the North-West region with a mission to bridge the gap between academia and the biotech sector. Our focus is to promote early-stage STEM researchers, offering them inclusive spaces for building connections with local and international

biotech industry professionals, fostering their growth, and providing invaluable career insights. Since our establishment in 2014, we've expanded our reach to students at various academic levels, hosting both in-person and online events throughout the years. In the past 12-months alone, we hosted 15 events, reaching over 500 students and establishing relationships with 50 different biotech companies.

Driving Optimization of Antibiotic Drug Design

Since its heyday in the 1950s, the discovery of new classes of antibiotics has decreased, dropping to zero in the 1990s and not recovering since the turn of the century. Worryingly, this decline in novel antibiotic classes has coincided with the acceleration of antibiotic-resistant pathogens, meaning the current arsenal of treatments will be insufficient to deal with the demands that bacterial infections will pose in the future. Therefore, the requirement has never been greater to develop novel classes of antibiotics.
