## Bionow News & Events

The latest Bionow News and upcoming Events

**Bionow is delighted to welcome seven new members!**

**We look forward to working with:**

**Festo | Axentia Biotech | Labdesk | Linesight | LYVA  
Labs | Pharmora | GM Business Growth Hub**

Our members are at the heart of what we do and by joining Bionow and working together we can achieve more. Bionow members have access to a fantastic range of benefits and services to assist with being globally competitive, delivering world class innovation and inspiring the next generation. Become part of our community!

## Partner Snapshot: Impact Data Metrics

Impact Data Metrics is a Bionow Preferred Partner for UK life science sector business intelligence.

Created by Impact Data Metrics, IDM Life Sciences provides the first accurate and current view of business activity in the sector. It is designed to overcome limitations that have long made it difficult to get a true picture of the sector, with even UK Government reports containing inaccurate, incomplete and out-of-date information.

With a convenient subscription model, IDM Life Sciences presents data in interactive maps, charts and tables with options for users to export data to other formats.

**Bionow Members will receive a 10% discount.**

### **We're recruiting!**

#### **Bionow Events Manager**

**Home based covering North of England & North Wales  
Full time, flexible hours and will consider part-time  
£34 - 37k plus excellent benefits**

This is a unique opportunity for an experienced events professional to join a focused, highly motivated team which supports the growth of the UK's Northern Life Science sector.

Candidates will be experienced in the design and delivery of events and looking to take their career forward to the next level. Bionow offers a comprehensive range of benefits (some after qualifying period) including pension, bonus, holiday purchase scheme and private healthcare scheme.

Interested applicants should send a CV and covering letter quoting current salary and references to [geoff.davison@bionow.co.uk](mailto:geoff.davison@bionow.co.uk).

**Closing date: 7th March 2024**

## **BioInfect 2024 celebrates new investment zone launch**

In a brand-new venue for 2024, The Spine in Liverpool was home to BioInfect on 8th February for the first time, with another great turnout of 170 delegates, 11 exhibitors and 10 poster abstracts to discuss the issues surrounding the increasing threat of AMR and how it can be tackled.

The agenda covered a range of topics, kicking off with a welcome address from Mayor of the Liverpool City Region, Steve Rotherham, sharing investment plans for the life sciences sector, before the official launch of the Liverpool City Region Investment Zone in Health and Life Sciences, after which panel sessions examined the state of the AMR nation, investing in AMR, the UK Antimicrobial Products Subscription Model and what's in the pipeline.

## **2023 Bionow Annual Awards Dinner Concorde Conference Centre**

**Thursday 7th March 2024**

The prestigious Bionow Awards Dinner is a highlight of the life sciences calendar and celebrates the achievements of the sector, showcasing the very best. Invite your colleagues and clients for an unforgettable evening dining beneath the iconic Concorde, which takes pride of place in the super hangar. Grab a glass of bubbles, take a tour and imagine you're travelling at the speed of sound to New York.

Join Bionow to mark this occasion in style - pop open the champagne and join us to celebrate all the award nominees.

## **Bionow Life Sciences Careers Fair Online**

**Thursday 14th March 2024**

**Which career path will you choose?**

Back by popular demand, the Bionow Online Careers Fair returns in Spring 2024 and is designed to help inform university under-graduates, graduates and post-graduates about the vast array of career paths available in Life Sciences.

**This event is free to attend for all students of universities that are Bionow members and sponsors as we bring companies from different sections of the Bionow community together to highlight the opportunities and career paths available in the sector.**

## **ELRIG Research & Innovation Conference The University of Manchester**

**20th-21st March 2024**

Bionow is a proud partner for this event, which will discuss how emerging biology and cutting-edge technologies are pioneering the medicines of tomorrow. The conference will bring together scientists, researchers and entrepreneurs with bold ideas to serve our shared ambitions in creating the next generation of therapeutics to cure more patients around the world.

The 2024 R&I meeting will comprise the following four main sessions:

- Animal-free drug discovery
- Oncology: Thinking the unthinkable and drugging the undruggable
- New horizons in tackling antimicrobial resistance
- Mass spectrometry and 'omics

## **Biotech & Beers The Newsroom Bar, Edinburgh**

**Wednesday 27th March 2024**

Come join us for our first ever Biotech & Beers in Scotland!

Biotech & Beers events contribute to a community of like-minded leaders who are focused upon real company growth in life sciences and offer opportunities for peer group support (even if it's just a chance to let off some steam!). It is a great space for some social networking to meet new contacts, compare notes and catch up in a pleasant and relaxed setting.

## **Yorkshire Bio-Partnering Cedar Court Hotel, Bradford**

**Tuesday 16th April 2024**

In partnership with:

Join businesses and scientists in this one-of-a-kind in-person meeting showcasing the benefits of industry-academic collaboration and sharing of funding strategies from experts in the Yorkshire region.

**The event will:**

- Highlight successful academic, clinical and industry partnerships through invited keynote speakers
- Promote the many types of funding and support available for innovation both in our region and UK-wide through a series of short presentations
- Provide an excellent opportunity for informal networking

## News

Keep up to date with Bionow Member, Partner and Sponsor News

### **PharmaKure announces epigenetics collaboration with Sheffield Hallam University to understand mechanisms of Alzheimer's Diseases**

PharmaKure, a clinical-stage pharmaceutical company developing precision medicines for Alzheimer's Disease (AD) and other neurodegenerative diseases, has announced a new epigenetics collaboration with Sheffield Hallam University. This partnership will focus on 'gene-based environmental biomarkers', known as epigenetic markers, for calculating risk scores for Alzheimer's diseases. Together with ALZmetrix™, PharmaKure's blood-based biomarker, this will increase the power of current Alzheimer's diagnostics.

### **Robotics and AI: Transforming Manufacturing Innovation Lab**

This Innovation Lab is an opportunity for businesses to overcome challenges by collaborating with academic experts in robotics and artificial intelligence (AI). It offers direct access to funding and a system of support for extended industry–academia collaborations, both of which can enhance your business's capabilities. This Lab is aimed at businesses working with robotics and/or AI in manufacturing. It will take place in spring 2024 (date to be confirmed).

## **UKHSA announced as first PACE collaboration to help tackle deadly antimicrobial resistance**

PACE (Pathways to Antimicrobial Clinical Efficacy) has announced a partnership with the UK Health Security Agency (UKHSA) to support innovators developing new antimicrobials.

PACE was founded in 2023 by LifeArc, Medicines Discovery Catapult, and Innovate UK, with a £30 million programme of funding and support to be deployed over five years. PACE is focused on removing barriers and connecting the antimicrobial resistance (AMR) research and development (R&D) ecosystem to accelerate and strengthen the pre-clinical pipeline. Its first funding call was launched in October 2023 with up to £10 million available to support innovators developing new treatments for the most threatening microbes and resistance mechanisms.

## **AMPLY Discovery raises £1.4m in Innovate UK grant funding to tackle complex diseases**

Belfast-based techbio company AMPLY Discovery Limited has raised over £1.4m in grant funding to develop new drug products using its proprietary AI-driven drug discovery platform.

The company is currently focused on two flagship R&D programmes which will provide technical validation for its development platform. The first programme, focused on RNAi therapies to tackle highly genetically mediated cancers, has been awarded £835,000 by Innovate UK and Innosuisse to develop a new RNAi therapy for Acute Myeloid Leukaemia.

The second programme, focused on inhaled antimicrobial therapies to fight multi-drug resistant (MDR) lung infections, has been awarded £602,000 by Innovate UK to develop a new nebulised antimicrobial product for MDR-TB.

## **CPI's RNA Centre of Excellence passes major milestone with GMP certification**

CPI's RNA Centre of Excellence, which opened last year, has passed a critical step after achieving GMP certification from the Medicines and Healthcare products Regulatory Agency (MHRA), bringing the facility closer to getting new, more effective drugs to patients with incurable or hard-to-treat illnesses.

The demand for RNA-based technology has boomed since the success of COVID-19 vaccines in saving lives and preventing serious illness. RNA-based therapeutics have many more potential applications: in other vaccines, in cancer treatments, and in personalised medicines, such as gene therapies and protein replacement.

### **Biotech start-up BugBiome secures investment for pioneering research in sustainable pest protection**

BugBiome, a biotech harnessing nature's microbial defences for pest protection to benefit human and planet health, has successfully closed a pre-seed funding round, securing £310k from Cambridge Angels and Discovery Park Ventures.

This investment will support BugBiome's mission to address agricultural and human pest protection with naturally derived solutions harnessing the microbiome as a sustainable source of alternatives to synthetic and bio-accumulative chemicals. It also provides matched funding for a £330k Engineering Biology Grant from Innovate UK, to identify new methods to control aphids in crop protection. The 12-month project aligns with BugBiome's focus for sustainable, insect control solutions that do not compromise biodiversity, including a pipeline of targets across human and agricultural pests.

### Life sciences: how can you prepare for UK GAAP changes?

In October 2023, the Financial Reporting Council (FRC) announced a delay to the publication and effective date of the future changes to UK GAAP from its periodic review.

The revised suite of standards reflecting the second periodic review of UK GAAP is now expected to be issued in the first half of 2024 and implemented not before periods commencing on or after 1 January 2026, instead of 1 January 2025 as originally planned.

## **European Parliament seeks ban on patenting of gene-edited plants**

European Parliament has supported proposals by the European Commission to relax the regulatory requirements for certain categories of plants produced by new genomic techniques (NGT) [1].

Currently in the EU, NGT plants are classified as Genetically Modified Organisms (GMOs), leading to some of the strictest regulatory requirements anywhere in the world. However, MEPs have voted for a simpler process for regulating categories of NGT plants which may contain modifications comparable to those obtained by conventional breeding. The stated objective for these changes is to make the food system more sustainable and resilient by facilitating the development of improved plant varieties.

### Corporate Patron and Sponsors

**Biscuit & Brew - BIO-Europe  
Spring 2024**

**Forward-Thinking, Innovation  
and Collaboration**

**13th March 2024**

**Hope Street Xchange, Sunderland**

**6th March 2024**

**Online**

BioPartner UK's Biscuit & Brew is our very own quarterly networking series, where you will have the opportunity to take a well-earned break from your busy schedule to catch up and meet with fellow attendees over a few biscuits and a nice brew.

Our informal tea break gives an opportunity for you to meet BioPartner members, and UK@BIO-Europe Spring delegates including Jessica Griffiths from the Department for International Trade (DBT) Barcelona.

This session is ONLINE and completely free to attend, come and join us for a nice brew and a catch up!

**REGISTER**

**BIO-Europe Spring 2024**

**18th - 20th March 2024**  
**Barcelona CCIB, Spain**

Small and Medium sized enterprises are warmly invited to attend the University of Sunderland Knowledge Transfer Partnership event, which is designed to bring Faculty of Technology academics and businesses together to explore how research and development can be undertaken and applied to solve business challenges and provide new opportunities.

KTP programmes exist to invite a team of academic researchers and a full-time graduate or postgraduate into a company to work with them across a period of time (normally 2 years). It is an Innovate UK funded programme, with industry contributing towards project costs, depending on the size of the project. This event will give you the opportunity to meet the companies taking part, network and learn more about the KTP Programme in general. This is a free event, breakfast and refreshments will be provided.

**REGISTER**

**How to implement predictive maintenance using artificial intelligence**

## **Northern Bioinformatives User Group Meeting**

**25th March 2024**

**Dorothy Fleming Lecture  
Theatre, Sheffield**

The Sheffield Bioinformatics Core are pleased to announce that we have just opened registration for the next Northern Bioinformatives User Group (NorthernBUG) meeting on 25th March which will take place in Sheffield. This is a free meeting aimed at those practicing Bioinformatics or Data Science or those wanting to learn more about the application of data analytics techniques to life sciences.

Submissions for a talk or poster are welcome.

This exciting two-day event will bring together clinical academics, allied health professionals, researchers from the engineering and physical sciences, methodologists, public and patients, industry, and experts in market access, medical device regulation and commercialisation in a truly multi-disciplinary forum to build networks, explore opportunities for new collaborations, and celebrate recent successes.

**REGISTER**

## **Astbury Conversation 2024**

**8th-9th April 2024**  
**University of Leeds**

Over two days, Astbury Conversation 2024 will bring people together from across the globe to discover, explore and inspire ideas whilst showcasing the innovations making waves in molecular biology.

This year's theme is 'Illuminating Life', which will shine a light on the hidden – and fascinating – world of macromolecules. Astbury Conversation is for anyone with an interest in the world of molecular biology, biophysics and medicinal chemistry, including academics, researchers, and businesses.
