Bionow News & Events

The latest Bionow News and upcoming Events

Bionow is delighted to welcome seven new members!

We look forward to working with:

**SMi Systems | Aelius Biotech | Guardtech Group | pobl.
| Temprecision International | The Business of Science
Conference | Blue Link Worldwide**

Our members are at the heart of what we do and by joining Bionow and working together we can achieve more. Bionow members have access to a fantastic range of benefits and services to assist with being globally competitive, delivering world class innovation and inspiring the next generation. Become part of our community!

Join Us

Partner Snapshot: C&C Insurance Brokers

C&C Insurance Brokers is a Bionow Preferred Partner for general and healthcare insurance.

C&C are a large, independent insurance intermediary with direct access to the world's leading Life Science underwriters. We recognise that Biotech and Life Science companies require specialised insurance programmes and our expert advice can assist you in identifying, planning for and managing the risks your business faces.

Additionally, the C&C Healthcare team are here to assist you and provide specialist, comprehensive reviews of all our healthcare products. We source affordable solutions, personalised specifically to your company's and employees' own needs and budgets.

Free, no obligation reviews of all Bionow members' current insurance programme and risk management procedures available

BIA Regional Focus: North East CPI, Darlington

Thursday 18th April 2024

Future skills - ensuring continued success of the sector

Bionow is excited to be an event partner of this networking session, which will discuss the current need for skilled individuals across our sector, along with how companies can attract and retain talent, and what can be done to further develop the pool of excellent people so that the UK can continue to lead the life sciences into the future.

With plenty of opportunity to network over lunch and refreshments, plus a BIA and sector update and fresh developments from science organisations based in the North East, we hope you will join us to celebrate and discuss innovative life sciences in the region and beyond.

Bionow members can get a 20% registration discount code - contact owain.walsh@bionow.co.uk for details.

Accreditation first as Keele University masters-level apprenticeship programme earns prestigious RSC quality mark

A masters-level apprenticeship at Keele University has made history by being the first scheme of its kind to earn RSC accreditation.

Successful apprentices on the Research Scientist programme will receive an MSc in technical leadership in analytical science.

The recognition of this apprenticeship scheme reiterates our organisational belief in the variety of routes open to technicians looking to progress their careers in chemistry. It also dovetails with our support of the Technician Commitment and marks our eighth total apprenticeship accreditation, covering levels from school leaver to postgraduate.

Northern Gritstone invests £2 million in adsilico

Northern Gritstone has made a £2 million investment into adsilico, a groundbreaking computational medicine company, spunout from the University of Leeds, based on research funded by the Royal Academy of Engineering.

In-silico trials (ISTs) use modelling and simulation to produce scientific evidence of device performance and safety, before testing in human clinical trials. adsilico has developed a ground-breaking technique that combines multiple data sources and uses generative AI across heterogeneous data sources, to create synthetic populations on a scale ideal for clinical trials. This will allow medical device manufacturers to accelerate R&D, reduce the need for animal experimentation, and augment costly human trials.

Host a summer intern with Lancaster University Biomedical and Life Sciences

**Please submit Expression of Interest forms by Friday
12th April**

Companies are being offered the opportunity to host a Lancaster University Biomedical Life Sciences student in their business for a four- to six-week internship in the Summer of 2024, running between July and the end of September. The project or role the student will be part of will be specified by the host company.

The internship does not have to be related to the student's area of study but could be in other areas that provide the student with the opportunity to develop complementary skills in addition to their academic learning to gain 'real world' experience.

An update on the patentability of antibodies at the European Patent Office

In a series of articles relating to the patentability of antibodies, we have previously provided an outline of the requirements associated with patenting antibodies and related biologics at the European Patent Office (EPO). In particular, we focused on the different ways an antibody can be claimed at the EPO and also the information often required in a patent application to support the presence of an inventive step.

The EPO has recently issued updated Guidelines for Examination, which entered into force on 1st March 2024. Some of the most significant modifications have been made to the guidance surrounding antibody inventions.

Biocair calls for greater investment in women in STEM

Despite the rapid growth of the sector, women currently make up only 26% of the STEM workforce in the UK and just 28% in the USA. To combat this disparity, Biocair echoes the United Nation’s theme of International Women’s Day 2024: “Invest in women: Accelerate progress”.

As the global specialist in temperature-controlled logistics for life sciences, Biocair understands the importance of having a diverse workforce with varied skills and experience. It has taken a unique approach to building its team, hiring scientists in front-line logistics positions and recruiting the most talented industry experts in quality, cold chain and regulatory compliance.

Manchester Metropolitan University launches new MBA programme for responsible leadership

Manchester Metropolitan University has launched a new, two-year, part-time MBA programme, designed for responsible leaders, managers, and employers. Using a blended learning approach, the MBA is aimed for students who want to learn flexibly around work, family and other commitments.

New hybrid learning approaches mean classes will consist of students working and learning together both face-to-face and remotely in real time. This approach to teaching and

learning, also known as 'HyFlex', means classes do not need to take place with all students online or all in-person. Instead, students will be able to fully interact with their peers and take part in classes regardless of whether they are attending in-person or virtually.

Three investors on taking action to avoid failure

Scaling a new business is one of the hardest pursuits you can take on in your professional life. No business is immune to failure, and it's estimated that 20% of businesses fail in their first year with 50% failing in their first five.

But even founders of the 50% who have gone on to enjoy success and make a mark in the world past the five-year itch have had the panic. The gut-wrenching feeling that they might not be left with a business at all in the future. It's part of being a founder.

So how should you behave when the proverbial muck has hit the fan or is about to? Take a breath and read on...

Biohazards & beyond: protecting property in life sciences

In life sciences, property can range from simple office spaces to high end developments while containing laboratories, research and development (R&D), and/or biotech facilities. Naturally, such an array of property types, in-house chemicals and processes creates risks which must be mitigated.

Supply for life sciences property in the UK is struggling to meet demand. Despite a lack of supply, there are opportunities: for example, the Canary Wharf Group (CWG) and science partner Kadans have acquired planning permission for a 23-storey tower dedicated to life sciences, becoming Europe's largest and most advanced facility of its kind, according to the CWG.

While the real estate industry attempts to match life sciences' demand, it would be useful to assess some of the most significant risks in life science property.
