## Bionow is delighted to welcome six new members!

We look forward to working with:

**Octapharma Ltd | Apexon | Awen Oncology Ltd |  
 EBSCO Information Services | ClotProtect | Eastmond  
 Medicomm Ltd**

Our members are at the heart of what we do and by joining Bionow and working together we can achieve more. Bionow members have access to a fantastic range of benefits and services to assist with being globally

competitive, delivering world class innovation and inspiring the next generation. Become part of our community!

### Join Us

## Partner Snapshot: Air Liquide

**Air Liquide is a Bionow Preferred Partner for compressed gases and dry ice.**

As part of the Air Liquide Group, the world's leading producer and supplier of industrial gases, medical gases and related services, Air Liquide UK has the capacity to apply its group resources and expertise to local market needs. Air Liquide UK supplies the Laboratory and Analysis markets with products that allow their customers to enhance their analytical performance and efficiency.

### Access the following from Air Liquide:

- Discounted speciality gases and mixtures
- ALPHAGAZ range of pure gases
- Dry Ice products and packaging
- Reduced delivery and collection charges
- Reduced charge for Cylinder rental
- Health and Safety Training for Managers, Supervisors and Users

## Meet the Member: Roslin CT

RoslinCT is a global CDMO focused on Advanced Cell and Gene Therapies. It was established in 2006, built upon the groundbreaking cloning technology of Dolly the Sheep. RoslinCT is one of the first to produce clinical-grade human pluripotent stem cells and developed the first CRISPR-based therapy for the treatment of sickle cell disease and beta-thalassemia, taking it from early development to commercialisation.

With 22 cGMP cell therapy processing suites in Scotland and Massachusetts, RoslinCT provides innovative PD/AD,

cGMP clinical and commercial manufacturing for a range of cell types for both autologous and allogeneic processes, and cGMP iPSC cell line development, gene editing, cell banking and differentiation.

## **Bionow's inaugural 2024 Neuroscience conference showcases key developments across the sector**

The first ever Neuroscience conference, hosted in Sheffield, proved to be a great success with 115 delegates and eight exhibitors collaborating and exploring the current challenges and opportunities facing the industry, including in R&D, commercialisation and implementation, and the impact on patient outcomes.

There was a tangible energy in the room as the tackling of neurodegenerative diseases gathered pace with this event bringing together experts from industry and academia to discuss the latest research and challenges, including early diagnosis and detection, treatments of the future, patient perspectives and funding and investment, along with a poster competition to showcase new developments and ongoing research projects.

## **Biotech & Beers BrewDog DogHouse Edinburgh Bar & Terrace**

**Thursday 5th September**

Come join us for Biotech & Beers in Edinburgh!

Biotech and Beer events contribute to a community of like-minded leaders who are focused upon real company growth in life sciences and offer opportunities for peer group support (even if it's just a chance to let off some steam!). It is a great space for some social networking to meet new contacts, compare notes and catch up in a pleasant and relaxed setting.

**From 5.30pm onwards in the upstairs bar**

## **Small Molecules Bites & Insights: Unlocking Solutions to Early Phase Drug Development Challenges Mersey, Alderley Park**

**Tuesday 10th September**

Join us for an engaging session hosted by Lonza and Bionow, where you'll discover strategies to overcome

complex drug development challenges in early phase. Our first Small Molecules Bites & Insights event in the UK offers a unique opportunity to learn from industry experts on how to accelerate the development of your drug substance and drug product, addressing critical first-in-human challenges.

#### Why should you attend?

- Gain valuable knowledge from experts in the field
- Learn actionable methods to streamline your development process
- Connect with peers over a complimentary lunch, expanding your professional network

PROUD SUPPORTER OF

## Pharma Industry Awards UK 2024 ICC, Birmingham

Wednesday 18th September

Bionow is a proud supporter of the Pharma Industry Awards UK 2024, which will identify and celebrate the most original and innovative individuals and companies that demonstrate excellence in the UK pharma industry. It is a unique opportunity to network with the industry's most influential players and top talent.

**The finalists have now been announced - special congratulations to Bionow Members, Premium Members, Partners and Sponsors Bouygues Energies & Services, Sai Life Sciences, CSL Seqirus, SkyCell AG, AstraZeneca, Manchester Metropolitan University, Tiro and East Durham College!**

Follow the link below to see the full list of nominees.

## One Nucleus at Biotech Week Boston Boston, USA

23rd - 26th September

Bionow is a proud collaborator with One Nucleus at Biotech Week Boston, showcasing UK strengths to Greater Boston investors, R&D partners and customers.

### **UK Pitching Day (Tuesday 24th September)**

Entries are now open for those companies developing novel therapeutics or innovative platforms for drug discovery and development to pitch to MA-based investors, Pharma dealmakers and Global Talent Network NED executives. The competition is open to companies at all stages of development and winners will be selected by a panel of UK- and MA-based judges.

**Entries close at 5pm BST on 9th August 2024 - [enter here](#).**

For more info about the events schedule, follow the link below.

**BioCap2024** CONFERENCE

## **BioCap 2024 The King's House Conference Centre, Manchester**

**Thursday 26th September**

**Whether you're looking to invest in the next cutting-edge life sciences innovation or seeking funding and investment opportunities for your business, BioCap is**

**not to be missed!**

BioCap features three great opportunities for potential investors and investees to interact:

- Digital Pitching Competition: Shortlisted applicants “pitch” to an online panel of investors (**application deadline: Friday 6th September**)
- Investor Dinner: Build valuable connections ahead of the conference
- BioCap Conference: A full day of networking, panel discussions, keynotes and 1-2-1s

## 21st Annual bioProcessUK Conference 2024 Liverpool

19th - 21st November

We're delighted to support the BioIndustry Association's bioProcessUK conference! Join us to be part of discussions around the new frontiers in workforce planning and exploring what's next for medicines manufacturing in the UK. The conference includes:

- Bustling exhibition showcasing 55 companies offering enabling technologies and services
- Learning about new frontiers in bioprocessing from 30 expert speakers and panelists
- 20 Early Career Researchers presenting their cutting edge work
- Networking with the UK bioprocessing community with 400 delegates from PhD to Boardroom

## University of Leeds Knowledge Transfer Partnership with Spur Therapeutics (formerly Freeline)

Spur Therapeutics (formerly Freeline) has developed ground-breaking gene therapies to treat people suffering with chronic health issues.

One of the technologies Spur Therapeutics uses is a modified type of virus - the adeno-associated virus (AAV) as a relatively small vector that can be used to introduce modified DNA (gene of interest) to patients to correct the missing or mutated gene causing their illness. Illnesses currently treated using Spur Therapeutics' gene therapy technology include Gaucher disease and Haemophilia B.

### Partnering for Progress: Enhancing Patient Adherence Through Autoinjector Access

In the aftermath of the massive cultural shifts triggered by the COVID-19 pandemic, the healthcare community is striving to make treatments more accessible for all patients, particularly those with chronic conditions who require ongoing treatment – cue the need for convenient modes of therapeutic administration. Though it is still vital for contract

development and manufacturing organizations (CDMOs) to offer flexible delivery modalities, including vials, pre-filled syringes, and autoinjectors, the latter is taking the market by storm.

## The HPV vaccine: the global success of prioritising women's health

### Understanding Cervical Cancer and HPV

Cervical cancer ranks as the fourth most common cancer among women worldwide. Nearly all cases are caused by high-risk strains of the human papillomavirus (HPV), a common virus transmitted through sexual contact. While most HPV strains are harmless, some high-risk types can infect cervical cells, leading to cellular changes that may result in cancer. High-risk HPV strains can also increase the risk of other cancers, such as those of the throat and mouth.

### Blog: What are the Four Main Steps of Next-Gen Sequencing?

Next-generation sequencing (NGS) rapidly sequences DNA/RNA using massively parallel sequencing technologies. The process of next-gen sequencing starts with fragmenting DNA, adding adapters, and amplifying fragments. These fragments bind to a flow cell and undergo bridge amplification, forming clusters. Sequencing by synthesis then occurs. Here nucleotides are added one at a time, each emitting a signal for real-time detection. The resulting data is computationally analyzed for base calling, alignment, assembly, and variant calling, enabling a comprehensive genomic analysis. Ultimately, next-gen sequencing is a high-throughput, scalable method that supports diverse applications from whole-genome sequencing to targeted gene panels. Therein lie the four main steps of next-gen sequencing: library preparation, cluster generation, sequencing by synthesis, and data analysis.
