## Bionow is delighted to welcome two new members!

We look forward to working with:

**Squire Patton Boggs | OneSC**

Our members are at the heart of what we do and by joining Bionow and working together we can achieve more. Bionow members have access to a fantastic range of benefits and services to assist with being globally competitive, delivering world class innovation and inspiring the next generation. Become part of our community!

## Join Us

### Partner Snapshot: Integral Finance

**Integral Finance is a Bionow Preferred Partner specialist financial partnering with a focus on the life sciences and healthcare sectors.**

Integral Finance work with clients to ensure that support is available at key times, such as in advance and during board meetings, interactions with potential funders, and in advance of relevant filing deadlines. Integral Finance will work alongside your existing management team and bring financial transparency to your business, identify opportunities for growth and develop financial capability, providing critical support from start-up to exit - meaning you build credibility and trust with key stakeholders and investors.

Services include:

- Transparency and reporting
- Funding and valuation
- Risk, control, governance
- Tax, accounting and company secretarial
- Targeted search and selection

**Bionow members will receive a 10% discount on valuation work - and an initial no obligation assessment of how rigorous valuation approach can add value to your business.**

## Information

Product and service information, blogs, funding rounds, reports and more from our Members and the wider life science sector

## How life science, biotech and healthcare marketers boost SEO without creating new content

If you're looking to boost SEO for your life sciences, biotech or healthcare website, your first thought might be to create new content. While this is the right thing to do in certain circumstances, optimising your existing content may actually have a more positive impact. Let's examine the benefits of reworking existing content versus creating something new.

## Driving Sustainable Change: How SkyCell is Revolutionizing Healthcare Logistics

The healthcare industry is a major contributor to climate change - emitting 4.4% of global emissions. A significant portion of this comes from the carbon-intensive nature of air transportation, an essential part of global pharmaceutical logistics.

But at SkyCell, we're not just acknowledging this problem – we're innovating to overcome it. Our main mission revolves around creating solutions that work exceptionally well while also being gentle on the planet. For a deeper dive into how we're addressing this issue, we invite you to explore our Annual Sustainability Report 2023.

### How OneSC's data-driven insights can lead to efficient workflows

The guiding force behind the evolution of OneSC are our users. By acting on the valuable insights and feedback from our partners, we have a new upcoming feature that is set to revolutionise your supply chain operations.

A well known industry problem in today's supply chain landscape is the lack of visibility. Supply chains are complex, intricate systems that need to work together across cross-functional departments and teams. The lack of visibility can largely hinder supply chain operations, causing disruptions that may lead to hefty compliance fines.

### NGS vs Sanger Sequencing

DNA sequencing, the process of delineating the order of bases (A, C, T, G) in a section of DNA, was first carried out in the 1970s.

There have been many developments since then, resulting in a range of modern sequencing techniques and technologies spanning diverse uses, both in the clinic and in academic research. This article will explore two commonly used sequencing methods, NGS vs Sanger Sequencing sequencing methods, looking at how they work, their respective advantages and disadvantages, and their applications.

## The Rise of IP-Backed Financing for SMEs

In today's knowledge-driven economy, intellectual property (IP) has emerged as a critical asset for businesses, particularly small and medium-sized enterprises (SMEs). Traditionally, IP assets such as patents and trademarks were often overlooked as viable collateral for securing business loans.

However, this trend is changing, with several financial institutions now recognising the intrinsic value of IP and offering specialised IP-backed financing solutions. This shift, combined with financial incentives in the UK such as the Patent Box and IP Advance, presents a significant opportunity for SMEs to unlock the value of their intellectual property and drive growth.

**Manchester**

**18th September 2024**  
**Online**

Therapeutically applying cell-based medicinal products (CBMPs) offers a state-of-the-art approach to donor-specific immunoregulation for reducing general immunosuppression in organ transplant recipients. Accordingly, an EU funded project called The ONE Study tested multiple regulatory CBMPs in a parallel series of kidney transplant (KTx) trials. The primary analyses from those trials have recently been reported for safety, and for potential immunological effects, when combined with reduced immunosuppressive treatment. The presentation will include results from these trials, as well as provide an update on other completed and ongoing cell therapy trials in organ transplantation.
