

2024 Oncology and Precision Medicine Conferences – Call for Posters

Submit your abstract for the 2024 Oncology and Precision Medicine Conferences

Oncology Conference: Tuesday 10th December

Precision Medicine Conference: Wednesday 11th December

Venue: Alderley Park, Radnor Reception, Suite 11S1

Abstract submission deadline: Monday 25th November 2024

The prevention of cancer and the development of more effective strategies for early-stage detection, when treatment may be most effective, remain critical societal goals. Precision medicine is the next generation of healthcare research that has the potential to provide significant, targeted benefits to patients, and effect strategic shifts in the way healthcare is delivered. Bionow is pleased to once again present a two-day event to explore the relationship between these two areas of healthcare and facilitate a more in-depth programme, including talks, panel discussions and networking opportunities.

Oncology

The oncology portion of the conference will cover the issues surrounding prevention and early diagnosis, then discuss the latest advances to address these challenges and translate the science into better care for patients. We will hear from experts, organisations and patient advocacy groups.

Precision Medicine

The second day of the conference will focus on the impact precision medicine is having on patients in the detection, treatment and prevention of diseases and how we are developing this approach in an efficient and sustainable way. Topics will cover new diagnostic test development and the importance of biomarkers to enable the identification of the molecular cause of disease, and how this can support the development of novel, targeted treatments.

Call for posters

There is no better way to showcase new developments, ongoing research projects and speculative or innovative work in progress relating to the study of Oncology and Precision Medicine. Authors are invited to submit an abstract which is related to one or both of these areas.

The posters are intended to provide authors and participants with a greater understanding of the subject matter and to engage in discussions about the work.

Authors must submit an abstract of no more than 300 words in English outlining aims, objectives, methodology and conclusions to matt.daly@bionow.co.uk **The poster must be prepared in A0 size (841 x 1189mm) in either portrait or landscape format.**

Abstracts can be related to Oncology, Precision Medicine or both, so authors are requested to specify the relevant area/s of study upon submission.

Posters will be on display in the main conference hall and the poster boards will be provided for authors to display them.

Please note accepted authors must register and pay the delegate fee to attend the conference.
