bionow[®]

what our members say

"Byotrol has purchased through Bionow since 2011 originally as a Premium Member. From October 2016 we transferred to Bionow's new specialist purchasing scheme, which is open to all Members, accessing the same great savings at the Member rate. In just five months we have expended £9250, saving £7500 – a reduction of 45% on laboratory purchases – plus a £1450 reduction in annual subscription."

Denise Keenan, Head of Finance, Byotrol

"Membership of Bionow has provided Seda with improved profile across the biotechnology sector in the North of England and more widely across the UK. Several new relationships have been established, some leading to short term business opportunities but also resulting in longer term strategic relationships. I wholeheartedly recommend Bionow as a route to expanding your business network."

Paul A Dickinson, Director of Product Performance, SEDA

"BioCap 2014 gave us an excellent opportunity to showcase Proveca Ltd to a new audience and potential new investors. The conference was well attended and provided lively and interactive networking opportunities as well as introducing the company to the increasing benefits of Bionow membership."

Dr Helen Shaw, Proveca Ltd

"Bionow's Lifescience Launchpad provided useful information and enabled me to make some key contacts. I've already started work with one of the presenters to further develop our product which wouldn't have happened without this course."

Dr Mike Davies, Chief Medical Officer, Blueberry Therapeutics

"Membership of Bionow has linked us into a range of sector specific networking events where we have connected with a number of interesting companies. We have also been heavily involved in the annual awards and were delighted to receive awards for Start Up Company of the Year in 2014 and Technical Service Company of the Year in 2016."

Dr Samantha Westgate, CEO, Perfectus Biomed Ltd

the smart route to business benefits
